

# NATIONALS GOLD COAST: What does my Registration Fee Cover?

## Accreditation

- 1 Your accreditation is proof of your registration and eligibility to compete, or in the case of non-competing officials access venues, fields of play and be recognised by competition management. This is provided digitally by the ID123 App for competitors and can also be used as proof when accessing participant only discounts and promotions.

## Venue Hire

- 2 With 33 sports over 7 days across one location, having enough fields of play is crucial to the delivery of a successful and enjoyable Nationals competition. UniSport works to secure approximately 30 venues across sports to ensure there are enough fields of play for all competitions to be played to their fullest extent.

## Competition

- 3 Each sport and competition has its own complexities, which are jointly managed by UniSport and the competition manager. Your registration fee goes towards the competition manager(s), officials, equipment (including match balls), medals and trophies to ensure a smooth and exciting competition!

## Risk Management

- 4 For all events risk management is a key item, for sporting competitions this is no different. As a part of our risk management, we consider venues, inclement weather, injury and a number of other potential risks and their severity of impact if they were to occur. Your registration goes towards mitigation of these risks, including insurance and engaging with Sports Medicine Australia for sports trainers and first aid at our competitions.

## Activations, Ceremonies & Experiences

- 5 As a registered participant for Nationals, you have access to exclusive activations, ceremonies and experiences. These include Unity Day, our Mascot Race, opening and closing ceremonies alongside smaller activations on-venue. We also have a number of event partners who provide discounts, promotions and services to our event participants. Previous examples of event partners include New Balance, Athena Sports Nutrition, Reset – Strength and Sports Recovery Centre, and Recovery Lab.

## Livestreaming

- 6 UniSport is continually growing our capacity for livestreaming year-on-year, with more sports and competitions available for watch by family, friends and other interested parties of those who travelled or have supporters unable to attend the event in person.
